Career Summary

Globant, Mexico City, Mexico

Web UI Developer, Sr

Aug. 2018 - Currently

Project: Red Sea Global

- Lead of the technical team in charge of the design, analysis, and development of an engine system that dynamically renders content-driven React components in a Next.js application. Designed and developed a React components library with RTL (Right-to-Left) support, consumed by the main Next.js app. Implemented internationalization for English and Arabic. Utilized Storybook for documentation and TanStack Query for asynchronous state management. The entire system was developed using TypeScript as the base language.

Project: Zinnia

- Responsible for the design, analysis, and development of components and features for a loans and mortgages platform. Technologies used: Next.js, React.

Project: Qurate Retail Group

- Developed and supported a web streaming application in Svelte for Smart TVs, utilizing GraphQL microservices to deliver marketing videos for product sales.

Project: Santander Mexico

- Developed a microfrontend using Angular embedded in an Android application, collaborating closely with the mobile team for integration.

Project: Tech Lead at Stanley Black & Decker - CribMaster

- Led the development, maintenance, and implementation of new features for a platform managing industrial products and inventory systems.

Project: Google - Genera BUP

- Responsible for the design, analysis, and development of components and features for the Genera BUP app. Technologies used: Angular, Node.js, TypeScript, Google Cloud.

Project: *Tech Lead* ATRIA Wealth Solutions

- Led the design, analysis, and development of components and features for a wealth management system. Technologies used: Angular, Node.js, Ruby, PostgreSQL.

Project: Rappi

- Developed and supported a retail management application using Angular for the frontend and Node.js for REST API microservices based on AdonisJS and Express.js.

Project: IHS Markit - Santander

- Developed and supported an application for managing and administering financial investment accounts, built with Svelte and Node.js services.

RAPPI México

Jul 2017 – May 2018

Full Stack Developer

- Responsible for the design, analysis, and development of components, microservices, and services for a customer care UI interface. The UI was built using Angular, and the REST API microservices were developed with Node.js frameworks such as AdonisJS and Express.js.

AMCO - Ironbit

Mar 2017 – Jul 2017

Full Stack Developer

- Designed and developed components, microservices, and services for a customer care UI interface. The frontend was developed with React, and the backend microservices were built with Express.js under Node.js.

Habitat Web

Mar 2016 – Feb 2017

Full Stack Developer

- Responsible for the design, analysis, and development of a UI platform to manage multimedia resources and documents for e-learning content. The UI was developed with Node.js, and the REST API services were built using the Laravel framework.

Ironbit

Nov 2015 – Mar 2016

Full Stack Developer

- Developed web platforms using AngularJS and the Django framework.

Engrane Studio

Aug 2014 – Jul 2015

Web Developer

- Developed microsites and platforms using HTML, JavaScript, and PHP.

Education

Applied Mathematics and Computation

Facultad de Estudios Superiores Acatlán, Universidad Nacional Autónoma de México, México.

2010 – 2013
